

Soil biology to improve plant health

with Mario Lanthier
CropHealth Advising & Research

Friday November 27

Armstrong

Odd Fellows Hall
3005 Wood Avenue

Saturday December 19

Kelowna

Mission Hall at 4409 Lakeshore Road
(corner of Lakeshore and DeHart)

8:30 to 4:00

Cost \$30 per person (includes lunch and coffee / tea)

For more information or to register, contact Cara Nunn
at the North Okanagan Organics Association, 250-540-2557

Proper manipulation of organic matter
can make plants healthier.
How do we do it? Come find out.
We will discuss ideas and recipes
you can implement immediately.

This intensive 1-day seminar will be of
interest to organic growers, landscapers
and persons working in horticulture.

Topics covered will include
preparation and testing of compost,
composts suppressive of plant diseases,
and use of commercial microbial inoculants
and mycorrhizal fungi.
